EDUCATION

KPR Institute of Engineering and Technology

B.Tech in Computer Science and Business Systems – CGPA: 8.1/10

Specialization: **Data Science**

Sept 2023 – May 2027

Coimbatore, India

TECHNICAL SKILLS

AI & ML: RAG Architecture, Transformer Models, pgvector, Pinecone, Scikit-learn, PyTorch

Languages: Python, SQL, Java

Backend & Frameworks: FastAPI, Flask.

Tools & Platforms: Docker, AWS, GCP, GitHub, Hugging Face, n8n

EXPERIENCE

Navigate Labs

AI Intern

Coimbatore, IN

Oct 2025 – Dec 2025

- Architected automated ETL pipelines using **n8n** for real-time email ingestion, attachment extraction, and intelligent routing.
- Developed a Document AI system leveraging **OCR and NLP** to extract structured data from unstructured PDFs and scanned images.
- Engineered a scalable image similarity search for **10K+ items** using deep learning embeddings

Finsight Analytics LLP

Machine Learning and Generative AI Intern

Coimbatore, IN

Jan 2025 – April 2025

- Built ML pipelines on financial datasets, utilizing **feature engineering and model tuning** to improve forecast accuracy.
- Designed a **RAG system** for Indian legal query resolution (GST/IT Act), enhancing query resolution accuracy by 40%.
- Evaluated retrieval strategies including **chunking and embedding optimization** for transformer based embedding generation

PROJECTS

Arivagam AI (Enterprise RAG System) | *FastAPI, PostgreSQL, pgvector, Redis, LLMs*

- Built a production-ready **RAG** system for finance/HR documents with hybrid retrieval (semantic + keyword) and reranking for high-accuracy responses.
- Implemented end-to-end pipeline: Document ingestion → chunking → embeddings → retrieval → LLM response generation with citations.
- Achieved 85–90% retrieval accuracy and 2–4s latency using async **FastAPI** and **Redis** caching.
- Implemented **guardrails** for hallucination detection and PII filtering, deployed via **Docker** Compose.

Support Triage Pro (OpenEnv-based AI Evaluation System) | *FastAPI, Docker, LLM, Hugging Face*

- Developed an AI-based incident **triage** system simulating real-world **SRE** workflows for automated issue classification and resolution.
- Engineered failure-handling logic for unstable services (35% simulated failures) with retry mechanisms.
- Built deterministic evaluation system to measure **LLM** decision-making across classification and prioritization.
- Exposed APIs with **FastAPI** + WebSockets and deployed on **Hugging Face** Spaces.

ACHIEVEMENTS & CERTIFICATIONS

- **Winner - Hackfest'25 (24hr):** Developed ArtVaani, an AI narrative commerce platform for artisans.
- **Finalist – ABB Hackathon:** Developed **AI/ML-based solution in competitive environment**
- **AWS Certified Cloud Practitioner:** Foundational mastery of AWS Cloud Services.
- **NVIDIA Certified** – Built RAG Agents with LLMs (RAG pipelines, embeddings, agent systems)
- **LangChain Certification** – Functions, Tools & Agents (LLMs, prompt engineering, AI agents)
- **n8n Certified:** Level 1 & Level 2 certifications in Workflow Automation and API integration.
